

Portfolio

SUMMER 2021

 Chris Hepburn Design

The content in this portfolio represents a sampling of my work. I enjoyed making each one, and I hope that you enjoy having one.

All the pieces in this portfolio can be made under commission. Some species of wood can be substituted in a design if the structure of the piece allows for it.

I would prefer to use locally sourced ethically cut woods such as culled diseased trees.

Exotic species may also be used as required. However, some wood species may not be available when we want them to be. In that case we can evaluate different woods that would blend with the intended design. Each species has wonderful characteristics... I find the use of diseased wood especially attractive.

Prices may change due to market conditions. That unfortunately is out of my control.

You being happy with your commissioned work is in my control. If you are unhappy for ANY reason, you may return the undamaged piece for a full refund.

* All commission work 50% down on order, balance on delivery. Delivery time based on current work schedule agreed upon before order. Shipping extra. Pickup free.
